GARMIN

The navigation phone

"Really? ... blue flamingos?"

It's not every day you get a call for blue flamingo lawn ornaments. So I searched yellowpages.com on my nüvifone™, made a few calls, and actually found a place that had them. I had no clue where it was. No sweat, I just tapped the address and followed spoken, turn-by-turn directions right to the front door. And I was able to take the call about the pink palm trees – while still navigating. Can't do that with just any phone. Try it yourself at nüvifone.com.

nüvifone™ For the location-based life.
